RESEARCH INTERESTS

My multidisciplinary research focuses on Ubiquitous Personalization, which combines Human-Computer Interaction (HCI), Computational Methods, and Inclusive Design to create a future where technology in everyday environments is personalized seamlessly to each individual's states, preferences, and needs. A key challenge lies in developing systems that effectively respond to diverse user abilities and hardly predictable use contexts. By advancing computational user interface optimization, user interaction simulation and analysis, and inclusive design methods, I make technology more intuitive, adaptive, and accessible for all.

EDUCATION

Ulm University, Ulm, Germany 06/2021 — present

Doctor of Science (PhD) Candidate in Human-Computer Interaction

Thesis Title: *A Framework for Computational User-Centered Optimization of Human-Vehicle Interaction Design*

Advisor: [Prof. Dr. Enrico Rukzio](#)

Committee: [Prof. Dr. Antti Oulasvirta](#) (Aalto University, Finland), [Prof. Dr. Philipp Wintersberger](#) (IT:U Linz, Austria)

Planned Defense: 12/2025

University College London, London, UK 01/2025 — 03/2025

Visiting Research Scholar with [Prof. Dr. Mark Colley](#)

Ulm University, Ulm, Germany 04/2018 — 05/2021

Master of Science in Computer Science

Overall Grade: 1.1, with Distinction - A-equivalent

Thesis Title: *SuiVR-Car-Seat: Utilizing a Motorized Swivel Seat to Explore Effects of Vehicle Motion on Interaction Quality in Virtual Reality Automated Driving*
Grade: 1.0 - A-equivalent

Ulm University, Ulm, Germany 10/2014 — 03/2018

Bachelor of Science: Computer Science

Specialized Subject Area: Biology

JOB EXPERIENCE

Ulm University Ulm, Germany

Research Associate

06/2021 — present

I significantly contribute to research and teaching. Also, I played a key role in co-leading and implementing the externally funded project *SituWare*. Furthermore, I successfully championed novel topics related to immersive data visualization and computational methods into the department's research scope. My work incorporates numerous research approaches such as experiments, interviews, focus groups, literature reviews, observation, usability testing, & dataset creation. It has led to over **15 peer-reviewed full papers**.

Zefwih GbR Neu-Ulm, Germany

CEO & Co-Founder

01/2022 — present

At [Zefwih](#), I lead business strategy while contributing to developing desktop, mobile, and virtual reality user-centered applications for commercial, culture, and research scopes. I also consult on early-stage digitalization projects, leveraging iterative design processes and HCI principles to encourage sustainable innovation. This experience refined my skills in HCI research from an industrial perspective, interaction design consultation, and project collaboration.

Ulm University Ulm, Germany

Student Research Assistant, Institute of Media Informatics

06/2019 — 02/2021

I contributed to the ideation and development of a multi-user shared content augmented reality platform and eye-tracking applications for virtual reality. This involved literature research, designing studies, and contributing to multiple publications. I also supported multiple lectures and exercises, tutored students during course projects, and evaluated their coursework.

Ulm University Ulm, Germany

Student Research Assistant, Institute of Communications Engineering

12/2018 — 03/2019

I led the ideation and development of voice-assistance applications in dialogue systems engineering, conducted literature research, and supported publication work. Additionally, I actively participated in internal review processes.

GRANTS, ACADEMIC and INDUSTRIAL SUPPORT

- *Startup Your Career* support (10.000€) by the [Graduate & Professional Training Center](#) at Ulm University
- Supported by the [Mobility Program](#) of Ulm University (2.800€)
- Supported by the German Federal Ministry of Transport and Digital Infrastructure (25.000€)

SERVICE and VOLUNTEERING ACTIVITIES

- Associate Chair / Program Committee Member:
 - Full Paper - AutomotiveUI '24'25, MuC '24'25, CHIWORK'25

– Late-Breaking Works (LBW) - CHI '23'24'25

- **Organizing Committee:** [AutoUI 2023 \(Registration Chair\)](#)
- Peer Reviewing: **Over 150 peer-reviews completed** so far for AutomotiveUI, VRST, **CHI**, IDC, ICWSM, GLS, MobileHCI, IMX, ETRA, COGAIN, CogSci, DIS, EICS PACM, CHI Play, ISS, ISMAR, Creativity & Cognition, MuC, NordiCHI, ICIS, OzCHI, ISWC, IEEE VIS, ICMI, HAI, PacificVis, **CSCW**, **UIST**, TEL, **IMWUT**, **TVCG**, **TRF**, and BIT
- Student Volunteer: CHI 2023
- Co-Organizer of the [Post-CHI Summer School On Automotive User Interfaces and Future Mobility](#)
- Co-Organizer of the [German Pre-CHI 2022](#) hosted in Ulm, Germany with more than 70 participants

TEACHING

Research Project in Human-Computer Interaction

Course Organizer: Co-organized an interdisciplinary project emphasizing user-centered design and design thinking, undertaken as a year-long, research-driven group effort culminating in several publications. Fall 2021 — Spring 2025

User Interface Software Technologies

Course Organizer and Lecturer: Led the development of course materials and delivered a weekly (interactive) lecture on designing user interfaces and interaction technologies, emphasizing a user-centered design process. Starting from the basics of interactive systems, the course explored interface creation, different media, and formal methods—particularly HCI notations. I co-led the evaluation process by grading the final exam and ensuring a fair, thorough assessment of student performance. Spring 2022 — Spring 2024

Automotive User Interfaces and Interactive Vehicle Applications

Course Organizer and Lecturer: Led the development of course materials and held a weekly (interactive) lecture on practical insights on developing and researching automotive user interfaces, teaching the user-centered design process. Delivered a yearly in-depth lecture on future mobility research and computational methods for automated vehicle user interface design. Co-led the evaluation process by grading the final exam and ensuring a fair and thorough assessment of student performance. Fall 2021 — Fall 2024

Research Trends in Media Informatics

Course Organizer: Co-organized the course, mentored PhD students on course structure and content, and provided detailed one-on-one instruction to over 10 students in conducting literature surveys using the [PRISMA](#) method. Additionally, took an active role in assessing and grading students' work. Fall 2021 — Fall 2024

THESIS SUPERVISION (Selection, Total>25)

Bachelor Theses

- Hermann Fröhlich (Ulm University and [PlanB. GmbH](#); 2024)
- Nam Anh Le Cong (Ulm University; 2024)
- Julius Schürle (Ulm University; 2023)
- Benno Hölz (Ulm University; 2023)
- Oliver Schmid (Ulm University; 2022)
- Christine Mayer (Ulm University; 2022)

Master Theses

- [Julian Britten](#) (Ulm University; 2025) **now PhD student at Ulm University**
- Sepide Ansari (Ulm University and [Spiegel Institute Mannheim GmbH](#); 2025)
- Mugdha Kesar (Ulm University; 2024)
- Svenja Krauß (Ulm University; 2023)
- Alexander Häusele (Ulm University; 2023)
- Alexandra Nick (Ulm University and [Cerence GmbH](#); 2023)

GUEST LECTURES

- University College London, [UCL Interaction Centre](#) (13.02.2025): "Ubiquitous Personalization"; *Future Interfaces* Course; in-person

AWARDS and NOMINATIONS

Outstanding Reviewer Recognition: IMWUT '22, ISS '22, AutomotiveUI '22 '23 '25, DIS '23, IEEE VIS '23, CHI '24 (x2), CHI '24 LBW, CSCW '24, MuC '24, UIST '24 '25, IMWUT '24 '25, and CHI '25

I have received 17 Outstanding Reviewer Awards, demonstrating my commitment to excellence in academic review processes. These recognitions reflect my deep understanding and critical thinking skills, which help advance scholarly discourse.

Honorable Mention Award at CHI '25 - DOI: [10.1145/3706598.3713514](#)

This paper addressed the challenge of scalable automotive user interface design. We implemented *OptiCarVis*, a system integrating Human-in-the-Loop Bayesian Optimization. An online study (N=117) demonstrates OptiCarVis efficacy in significantly improving trust, acceptance, perceived safety, and predictability without increasing cognitive load.

Audience Choice Award at CHI PLAY '20 - DOI: [10.1145/3383668.3419917](#)

As technical attacks become harder to execute, social engineering exploits the human factor of information security, often going undetected and causing high organizational costs. To address this, we presented "The Social Engineer", an immersive VR game designed to raise

awareness by letting players experience various social engineering methods in a simulated company environment. This extensible tool can serve as employee self-training, aid security experts in teaching awareness, and provide consumer engagement.

Moreover, the serious game “The Social Engineer” was nominated for the **Young Talent Award at German Computer Game Awards '21**. The same project was also a finalist for **Best Student Game Award at Games for Change Awards '22**, and it was subsequently nominated for **nextReality.Contest '22** in the “Young Talent” category.

SKILLS

- **Research:** Proficient in **quantitative analysis** using R (parametric/non-parametric data, linear regression, hierarchical models) and **qualitative analysis** following [Saldaña's](#) guidelines
- **Coding:** R (data analysis, visualization, web scraping), Python (computational modeling), Java, and C# (particularly with **Unity**)
- **Fabrication & Engineering:** Experienced in 3D printing, electrical engineering, and microcontroller programming (Arduino, Raspberry Pi)
- **Sensing Technologies:** Adept at using physiological sensors (eye-tracking on desktop/head-mounted display, wearable sensors for heart rate and skin conductance), motion tracking (computer vision using RGB camera input and infrared-based body/hand tracking), and vehicle telemetry (interior/exterior cameras, OBD) for data analysis and interactive, as well as adaptive systems
- **Open Science:** Proficient in [open science practices](#), transparency, reproducibility and accessibility; experienced in sharing data ([example](#)) via open-access platforms, using open-source tools, and contributing to community projects
- **Languages:** German (native), English (proficient), French (intermediate).

MAJOR PUBLICATIONS (CHI, IMWUT, UIST, TOCHI)

ACM [CHI/IMWUT/UIST/TOCHI](#) are widely recognized as the premier venues for publishing research in the field of HCI. They are highly competitive, with acceptance rates typically ranging between 20-25%.
